Dear Rob,
here is a solution of your problem.

Exchange _EXTRA with _STRICT_EXTRA then it works
But then you have always to write completely the keywords as
you did in the example.

regards
Reimar

```
PRO test1, _REF_EXTRA = extra,dummy=dummy
```

```
    testStuff = ['TITLE','XTITLE','YTITLE']
```

```
    test2, INDGEN (10), _EXTRA = [testStuff, 'XRANGE']
```

```
END
```

```
PRO test2, plotStuff, _STRICT_EXTRA = extra
```

```
    PLOT, plotStuff, plotStuff, _EXTRA = extra
```

```
END
```

```
