Subject: Image analysis and ring identification
Posted by Rachel Pepper on Wed, 17 Apr 2002 13:55:58 GMT

I am a fairly new IDL user trying to use image analysis to determine
particle positions in my images. After filtering the images, they
appear to be bright rings around a dark center. I was wondering if
anyone knew a routine to fit these sorts of images to a circle so that
the center of the ring could be determined. Thanks for any help!
