Subject: memory problems on Win2000 or how to delete a variable
Posted by Dominik[1] on Wed, 17 Apr 2002 06:59:46 GMT

Hi NG

for performance tests, we want to run a programm, which is creating a lot of
big arrays. But after some runs, IDL cant allocate any memory any more.
Can somebody give me a hint, how to delete a variable?

Thanks
Dom
