I want plot a graph with errorbars where the graph has the same color like the errorbars.

Example:

```
x=[1,2,3]
y=[1,2,3]
error = [0.1,0.2,0.1]
```

```
loadct, 39
plot,x,y,xrange[0,4], yrange[0,4], color=0, background = 255
errplot,x,y+error,y-error
```

Now the graph is black and the errorbars are white, but they should be black.

In ERRPLOT it is not allowed to use the KEYWORD color = 0 (black).
