It is shipping now. I think they were on schedule (1st of Oct) with the release. The recent floods in Houston may have slowed things down - VNI's shipping dept is there.

Of course, if you're like me, they will ship the CDs to your company/ university Config. Mgmt. group, who'll re-mail them to the Site Libraries, who'll check them out to the Admins, who'll then install it at their leisure. Around here, this can be a several month process (most of the time spent in the last step).....

;Dave
