---

I want to make 3-dim animation which deal with climatology data with idl.

I found the example in noaa homepage.

But i don't want to get fantastic results yet because i am beginner

I want to get the advice about 3-d plot and 3-d animation from you

I don't know how must I start about it .

I want a good example...

is it possible to realize 3-dim animaion with idl ?

I want to look fantastic output
