Hi, there,

I use read_tiff to read an image file in, the INTERLEAVE of the file is 2
(Planar interleaved [Columns, Rows, Channels]). But when I want to write
the image using DIALOG_WRITE_IMAGE, the result is totally wrong. The
INTERLEAVE of the file saved is [Rows, Channels, Columns]. How can I set
INTERLEAVE type in DIALOG_WRITE_IMAGE?

Best regards,

Xiaoying Jin
