Hello folks

My IDL WWW page is off the air, as indeed is everything that used to be under

<http://katipo.niwa.cri.nz/~hadfield/>

This is a result of a change in NIWA's network-access arrangements. I could probably get the IDL page reinstated but I'm too busy to deal with it right now.

Actually, I've never received a great deal of feedback about my IDL page and I wondered if anyone would notice it wasn't there. Someone did notice and ask me about it (thanks, Wayne) so I thought I'd better make an announcement to this group to save others the inconvenience.

The WWW page in question used to contain links to my all-singing, all-dancing, kitchen-sink-included MGH_Motley library. I still use and maintain this and can send a copy to anyone who wants it by e-mail, ftp, whatever.
