Both myself and Ken Mankoff have been selected as beta testers for IDL on Mac OS X. In addition to the collection of IDL routines that we work on at LASP, we are looking for neatly packaged IDL routines that we can use to test this pre-release to its limits. As I imagine there are some others on this newsgroup who are in the beta program, I would ask that you post URLs to these packages so that we can test them out in IDL for OS X, and compare them to the official release of IDL for Solaris and Linux.

Please don't ask us for copies of the beta pre-release. We're happy that IDL has selected us as beta testers.

Thanks,

Tim Lloyd, lloyd@lasp.colorado.edu
