Rick Towler kindly sent me some postscript files created with IDL 5.5, and I observe the same problem as with IDL 5.3, so I can verify that it's not caused by the postscript bug that RSI fixed after IDL 5.3.

I also tried running Illustrator 9.0.2 in Classic mode under OS X, and I have the same problem (with the small difference that both encapsulated and non-encapsulated files fail silently, giving a blank page, rather than the latter giving a parser error).
