## Subject: segmentation of more channel images
Posted by Ulfer on Wed, 05 Jun 2002 10:35:57 GMT

how i can do it that i segmentate images. then give the individual segmented structures numbers and give them other colors. visualize the selected strukturesand last give out the volume in tiff format or count the colored structures! mybe i need example codes.... that what i find in internet were shit!!! you know perhaps some other search machines to find a lot to odl?? thanks for answering
