Here is a program called Journal_Unique. Make this the startup
file for your IDL session. You will have a different journal
file for each IDL session that you start.

```
*****  
PRO Journal_Unique  
Journal, String('journal_', Bin_Date(SysTime()), '.pro', $  
    Format='(A, I4, 5I2.2, A)')  
END  
*****
```

Cheers,

David
