hi Tom,

i've wondered too if there's a keyword in the plotting procedures to adjust axis thickness. what i currently do is directly change the system variable that affects axis thickness, namely:

```
!X.THICK = 2.5          ;set x-axis line thickness
!Y.THICK = 2.5          ;set y-axis line thickness
```

hope this helps!

best,
-Johnny
