Subject: Re: ON_IOERROR working
Posted by Pavel A. Romashkin on Fri, 21 Jun 2002 21:12:37 GMT

Asti,
You got it right. This quite ugly piece of code relies on IO errors to
work. ON_IOERROR will redirect program execution and thus jump out of
the endless NEXT: GOTO NEXT thing. Whatever you do, don't write anything
like this yourself.
Cheers,
Pavel
