Marty Ryba (ryba@ll.mit.edu) wrote: : Hello all, Does anyone have a technique to get the PostScript driver to do a shaded : fill pattern with POLYFILL? There's the mysterious FILL PATTERN keyword, : but it seems to have no effect on the PostScript driver, which is strange : since patterned fills should be a piece o' cake in PS, and many drawing : programs provide standard fill patterns, including various percentages of : even fill (for example, I'd like a 30% fill of red on a polygon). A : bit of trial and error (mostly error) with the PATTERN keyword provided : similar output. Line filling works, but I'd like something snazzier. : Thanks.... : Dr. Marty Ryba | Generation X: MIT Lincoln Laboratory Too young to be cynical, ryba@ll.mit.edu too old to be optimistic. : Of course nothing I say here is official policy, and Laboratory affiliation is : for identification purposes only, blah, blah, blah.... I would have thought the easy way would be to use a colour defined with r = 255, g = 180, b = 180 (or thereabouts) and a solid fill. | School of Physics & Space Research | O | James Tappin. sjt@xun8.sr.bham.ac.uk | University of Birmingham "If all else fails--read the instructions!"
