Subject: write_jpeg and TVRD()

Posted by r_cherukuru3 on Sat, 29 Jun 2002 21:35:31 GMT

Hi!

I had generated a colourful plot and i had been trying to save this
by writing it into a jpg file using write_jpeg, but somehow i could
only save a grey scale plot!!!

My program looks something like this::

plot,x

oplot,y,color=10000
oplot,z,color=100000

write_jpeg,'myplot.jpg',tvrd()

Can anyone tell me, what is the missing part in my line which may help
me in saving my plot with colors?

thanks in advance
RC
