
Subject: unwanted color bands in image display

Hi everybody,

Thanks for answering my little queries. I have one again.

When I try to display image with TV or TVSCL, or for that matter, store as a PS and then view it, it always shows annoying color bands or lines in the image. These bands are generally red or blue, depending on the monitor properties I guess. I tried to use, device, decomposed=0, but that doesn't make any difference. I am quite frustrated with this thing, and hence I like to use LIVE TOOLS instead of TV things, but they have limited capabilities. Any suggestions for removing these color bands ?

Thanks,
Asti
