Subject: Videosequence reader/writer for Weinberg speedcams
Posted by herobau on Sun, 14 Jul 2002 13:13:42 GMT

Hi,
I am an IDL beginner.
I have a video sequence from a camera similiar to this one:
URL http://www.weinberger.ch/en/pages/system/visario/system.htm

The files have the extension BLD.

Did someone have experience with such a camerasystem and can
share routines to read/write the data with IDL?

Hope to hear soon from you

Helma
