I run IDL while on my PowerMAC running MacX and have had no real problems.
I used the Mark Rivers test and ran the IDL tour in the xdemo and had no problem.

Particulars:

IDL 3.6.1a

System 7.5

MacX 1.2 -this is not accelerated.. :(

I let MacX grab 6M of RAM (it usually is only using 2M) but when I only had 8M of RAM I ran out of memory (with a couple other apps open) and this caused problems.

Anyways, I thought I would add my belated \$0.02 worth.. :)

Steve
