
Subject: Obtaining image of screen

Hello,

I have an IDL program which creates a window containing various widgets, including a drawing area made with `WIDGET_DRAW`. I can draw something in the drawing area and save the image of what is drawn to an array using `TVRD()`. What I want to do is to save the entire window into an array as an image, not just the graphics portion of the window, but everything in the window including all the widgets. Does anyone know how to do this?

Thanks,
Alan Ling
