Hello, All,

I have a problem about using plots. I want to use two plots for two different data sets at the same time. If I just use one plots for one data set, there is no problem. But when I use two, it doesn't work. It seems the two plots interrupt each other. I want to know why?

Thanks very much for any kind of help!

I attach my simple program below:

```
.*****
,
pro testPlots
arrayT = fltarr(11)
arrayX = fltarr(11)
arrayY = fltarr(11)
window, 1
x1 = !X & y1 = !Y & p1 = !P
window, 2
x2 = !X & y2 = !Y & p2 = !P
for i=0, 10 Do begin
    arrayY[i] = cos(i+1)
    arrayX[i] = sin(i+1)
    arrayT[i] = i
wset, 1
!X = x1 & !Y = x1 & !P = p1
plots,arrayT[i], arrayX[i], /continue
wset, 2
!X = x2 & !Y = y2 & !P = p2
plots,arrayT[i], arrayY[i], /continue

endfor

end

.*****
,
```
