Why don't using Postscript Output?

```
old_dev=!D.name
SET_PLOT,'PS'
```

```
DEVICE,FILENAME='my_output.ps', PREVIEW=0,$
/COLOR, YOFFSET=27, YSIZE=16,XOFFSET=2,XSIZE=25,$
/LANDSCAPE
```

TEK_COLOR

```
x=INDGEN(37,/FLOAT)*10
y=SIN(x!*dtor)
PLOT,x,y,/nodata
```

```
OPLOT,x,y,linestyle=3,PSYM=-1,THICK=2,COLOR=2
DEVICE,/CLOSE
SET_PLOT,old_dev
```

If you then like to have an image you can use for example

```
pstoimg -type png -aaliasfont -crop a -density 150 -flip r90
my_output.ps
```

```
display my_output.png
```

Comment from the help:

```
pstoimg - Convert a PostScript file to a bitmap image
using Ghostscript and the Netpbm utilities
```

The output as image has this way a much higher quality!

regards

Reimar
