Hi,

IDL seems to round off large decimal numbers. For e.g.,

```
IDL> x = 284.766117
```

```
IDL> print, format='(I11)',x*1000000L
```

```
284766112
```

```
IDL> x = 284.766119
```

```
IDL> print, format='(I11)',x*1000000L
```

```
284766112
```

Is there any way around this?

Thanks,

-amar
