Dear David,

interesting suggestion. I checked it out with the following result

IDL Version 5.4.1 (linux x86). (c) 2000, Research Systems, Inc.
IDL> window,set_x_id='194.94.209.12:0.0'
Xlib: unexpected async reply (sequence 0xaa)!
% X windows protocol error: BadDrawable (invalid Pixmap or Window parameter).

It seems the keyword is still there but the connection to the X server
could not be established.

regards,

B.St.
