This scale goes from black to orange:

```
color = 30.0
h  = REPLICATE(color, 256)
s  = REPLICATE(1.0, 256)
v  = FINDGEN(256)/255.0
COLOR_CONVERT, h, s, v, r, g, b, /HSV_TO_RGB
TVLCT, r, g, b
```

To go from white to orange use:

```
h  = REPLICATE(color, 256)
s  = FINDGEN(256)/255.0
v  = REPLICATE(1.0, 256)
```
