New HDF5 Read and Query Support for IDL 5.5 -- Free Download

(http://www.rsinc.com/services/output.cfm?tip_id=3349)

"A plug-in to enable reading and querying HDF5 data files in IDL 5.5 is now available via free download for UNIX and Windows. The IDL HDF5 plug-in can be added to an existing IDL 5.5 installation."

I don't know when IDL will incorporate the ability to *write* HDF5, though.
