This guess is half of it, I suppose :-) He either doesn't have it or it's in the wrong place (very unlikely) OR he has installed Motif 1.1.4 and not 1.2 which is the one, IDL3.6 needs.

You should run

lspp -l X11*motif*

and this should return at least:

X11rte.motif1.2.obj 01.02.03.00 AIXwindows Motif 1.2 Run Time Support
