Hello everyone
I'm interested in finding out if anyone is using PVWAVE Command Language
4.2 or 5.0 with ULTRIX 4.4?

Likewise, I'm also interested in knowing if anyone is using PVWAVE
Point& Click version 2.0 with ULTRIX 4.4???

We'd like to upgrade to ULTRIX 4.4, but these two products were
built with ULTRIX 4.3...
Visual Numerics is not planning on supporting ULTRIX beyond version 5 of
Command Language anyway.
But, we're using both these products and would like to upgrade if there
are no serious problems in doing so????

Thanks in advance for any information....!
