Subject: copying of objects

Posted by Sebastian Loebbert on Tue, 08 Oct 2002 09:28:08 GMT

Hi all,

how can I copy an object?
E.g.:
v0 = OBJ_NEW('IDLgrVolume')
v1 = v0

v1 only contains only a reference to v1, so I cannot use v0 and v1 in
different model trees, which is what I need.
I was looking for something like
v1 = OBJ_NEW(v0), but this doesn't work.

Any ideas?

Thanks a lot,

Sebastian
