Folks,

We have asked for it, we have pleaded for it, and we have even begged for it. And now it's here!

JD's long-awaited Histogram Tutorial is finally available on my web page:

http://www.dfanning.com/tips/histogram_tutorial.html

If you have stayed awake nights thinking about fast algorithms in IDL, or wondered how to gain entry to the IDL Expert Programmer's Association with some loop-free trick that astounded your colleagues, here is your chance to learn how it is done. *Everything* is here. Never fear Reverse_Indices again.!

Of course, while you are there, check out JD's famous Dimensional Juggling and Array Concatenation tutorials, which complement the HISTOGRAM and let you in on *all* of IDL's secrets:

<http://www.dfanning.com/documents/tips.html#Tutorials>

Nothing is beyond your grasp now! Come and get it!

Cheers,

David

P.S. Let's just say JD asked me if I couldn't tone the announcement down a bit. This is the best I could do. :-(
