I want to make a plot of contiguous stacked plots, like so:

```
|-----|
|       |
Y1 |     |
|       |
|-----|
Y2 |     |
|       |
|-----|
Y3 |     |
|       |
|-----|
Y4 |     |
|       |
|-----|
0  1  2  3  4 (etc.)
```

X label

Any hints? I know it probably is a rather convoluted series of AXIS statements, but if I can save some time...

Thanks,
