Subject: Begin statement

Posted by hahn on Thu, 05 Jan 1995 04:20:48 GMT

Obviously I'm unable to execute compound statements:

When I write the following loop:
```
    for i=1L, 4 do begin
    help,  i
```

I get
```
I    LONG  =      5
```

and it looks as if begin is immediately followed by end:

IDL. Version 3.6.1b (windows 3.1).
Copyright 1989-1994, Research Systems, Inc.

```
IDL> repeat begin
```
```
& END
   ^
% Syntax error.
```

Any clue ?
