## Subject: do SMOOTH not on all data Posted by David Oesch on Wed, 30 Oct 2002 15:57:23 GMT View Forum Message <> Reply to Message

Hi outthere,

I just want to use SMOOTH on a 2D array. But some data are bad (-9999) and should not be considered in the smoothing process. Well trying to assign those bad data like this novalid=WHERE(array NE -9999) result=SMOOTH(array(novalid),5)

DOES not work.

I think the solution is using 'NaN' option, but how to I assign -9999 as NaN as the !VALUES.F\_NAN is write protected?

Cheers

Dave
