---

Hi all,

After playing with several pieces of code I've found in the archives,  
and not having any luck, I figured I'd ask someone here.

I have X, Y, Z points in space with a,b,c vector component values.  
I'd like to plot these in 3-D space. The data points are in the form  
of a rectangular regularly spaced grid.

Any help would be appreciated

Jim Blackwell
