HI..
 In order to perform 3D dilation, i need to create a 3D structuring
element. Can anybody tell me how i can create a 3D matrix.
 I have a 2D matrix as
 Str_Elem = [[1,1,1],[1,1,1],[1,1,1]]
I want to extend it to 3D. Please help me with this.

Please let me know if there is any way to access the ERODE or DILATE
code?

Cheers,
Akhila.
