Subject: IDL calling C
Posted by nrk5 on Thu, 07 Nov 2002 19:58:15 GMT

Hi,

I was wondering if anybody could point me to some resources for
calling C functions from IDL. I have never done this before myself and
am quite unfamiliar with C. I have somebody else's .h and .c files and
need to call their functions from IDL, but have little understanding
of the internals of their stuff. Thanks!

Nidhi
