If I understand correctly, this should do what I want:

PRO OPRINT,input

```
bksp = REPLICATE(8B,16)
PRINT,format='(a,$)',STRING(bksp)+input
```

END

IDL> FOR i = 0,100 DO OPRINT,'Number'+STRING(i)

All I should end up seeing is "Number 100". It doesn't work like
that(windows98, 5.5). I tried it with different bksp characters. Still
no. Why oh why oh why?
