If I understand correctly, this should do what I want:

```
PRO OPRINT,input
```

```
    bksp = REPLICATE(8B,16)  
    PRINT,format='(a,$)',STRING(bksp)+input
```

```
END
```

```
IDL> FOR i = 0,100 DO OPRINT,'Number'+STRING(i)
```

All I should end up seeing is "Number 100". It doesn't work like that(windows98, 5.5). I tried it with different bksp characters. Still no. Why oh why oh why?
