Hello,

For those using Display (I know there are a few brave souls out there judging by those couple dozen downloads), there is an update available.

Aside from bug fixes, the update includes two new main keywords:

ALL - applying properties such as LINK or ROI\_COLOR to all of the displayed DISPLAYs,

MP\_FIT - for fitting one of the named displayed plots with a function of your choice using MPFIT library, available from Craig's site. The fit plot appears in DISPLAY window together with the original data, and can be saved, printed, etc. Resulting fit coefficients are exported as a keyword parameter.

Syntax is provided in the header, and I will be updating the html web page... soon.

[http://www.ainaco.com/idl/idl\\_library/display.pro](http://www.ainaco.com/idl/idl_library/display.pro)

Hope this is useful.

Thank you,

Pavel
