Subject: Contour labels, Hooray!

Hi Folks,

I just got my IDL 5.6 version installed and the first thing
that caught my eye was contour labeling for object graphics
contour plots. Hooray!

Of course, half the labels are upside down, but at least
we have something to work with now. And, heck, it's easy
enough to rotate the contour plot in object graphics so
you can read the labels without breaking your neck. :-)

Cheers,

David

P.S. Let's just say I didn't read about ALL the keywords.
I'm sure there is something in here that fixes this little
problem. :-)
