To Group,

x=[2,4,6,8] y=[200,400,600,800] plot,x,y

One gets a plot. But not what I want.

I need to replace the x-axis with the following axis:

where x=2, a label 'cat' where x=4, a label 'dog' where x=6, a label '1.7' where x=8, a label 'fish'

I know how to suppress the original x-axis, but don't know how to put the new one in. I am not into object graphic either.

Thanks in advance, Mark
