Opps, sorry. My ISP costs have really gotten out of hand recently (teenagers and lots of computers in the house is a recipe for disaster, I've found out) and I was trying to get to the source of it.

Alas, once I got the file sharing software banished from the house, that turned out to be only part of the problem. The basic problem, I'm told, is that I have a "popular web page". Oh, oh. I think I've mentioned in this space how dangerous it is to wish for something. :-(

Anyway, I got a little too zealous in cleaning things up. You can find the program here:

http://www.dfanning.com/tip_examples/scatter_surface.pro

Cheers,

David
