Hi all,

My program uses "WRITE_IMAGE" that I have included in my SAV file
but when I run it with idlrt, it reports:
"Attempt to call undefined procedure/function: 'WRITE_IMAGE'"

SAVE, FILENAME = '<filename.sav>',$
    /ROUTINES,$
    /verbose,$
    'WRITE_IMAGE', ...

How should I declare the WRITE_IMAGE in the SAVE procedure?

Regards,

Cinthia
