Subject: Windows Question Related to IDL
Posted by David Fanning on Wed, 18 Dec 2002 19:51:37 GMT

Folks,

Do you know when you start a windows application up,
the icon and window title for those windows change,
reflecting the new application? IDL's windows, for example,
have the little green/red squares logo in front of what
looks like a notebook (I don't know, don't ask me).

Where do these windows find their icons? If I wanted
to replace the IDL icon with an icon of my choosing,
how would I do that? I presume this might be a register
thing, but I don't really know where to look.

Ideally, I would like to be able to create customized
windows for my customer applications.

Thanks,

David
