
Subject: Testing for NODATA presence in a dataset

I'm having a problem testing for whether an entry in an array is NAN --
doing something like:

```
If (value EQ !VALUES.F_NAN) then begin
    print,'Not a number'
Endif else begin
    print,'Is a number!'
Endelse
```

Will always return 'Is a number', even if I set:
value = !VALUES.F_NAN

What's going wrong with this?
