Here is the trick:

```
IDL> Device, Decomposed=0
```

But, if you don't want to have to worry about this,
choose your colors in a device-independent way with
FSC_Color.

```
Plot, findgen(11), Color=fsc_color('yellow', $
   Background=fsc_color('charcoal')
```

You can find more about this here:

  http://www.dfanning.com/documents/programs.html#fsc_color

Cheers,

David
