Hi;

We recently moved to IDL 5.5, running on a Dell Inspiron laptop under Linux 8.0, with an NVidia Gforce 4 card. Everything works really well except for one irritating bug - IDL doesn't recognize the arrow keys. No other program I run has that problem, so I assume it is either an issue with IDL or the way I have it set up. Any thoughts out there about how to fix this problem?

TIA,

Chris
