Humm. Dialog_Pickfile appears to be "sticky" on Windows.
Maybe this is an X window thing. :-)

You might try FSC_FileSelect, a file selection compound widget,
found on my web page. There is a little example program at the
end of the file to show you how to use it:

```
IDL> .com fsc_fileselect
IDL> example
```

I'm not totally sure how it looks in X windows, but I
haven't had any complaints about it, so... You can find it here:

  http://www.dfanning.com/programs/fsc_fileselect.pro

Cheers,

David
