: >IDL> randu = randomu(seed)
: >IDL> print, randu, seed
: Not random ...

Here is how I get around this:

 rnd = randomn(s,10) & rnd = rnd(3)

As was mentioned, just don't chose the 1st element.   If you need
many random numbers, use eg rnd = rnd(1:9)   Don't call randomu
(or randomn) repeatedly.
