Subject: formatting array output?
Posted by Murat Maga on Thu, 30 Jan 2003 16:03:41 GMT

Hi All,
I have an integer array (2000x1000) which I would like to write in file
in the typical matrix convention. I think IDL breaks the line at 80th
column and everything starts to look quite messy.
To format an array output, do I use the print/printf, or are there any
other tricks good to know?
Best,
Murat
